

## B&B Strupetou

### COVID-19 containment measures taken within our facility

To protect the health and well-being of our guests, we have decided to adopt, for this moment of emergency, very restrictive measures which are however aimed at ensuring the possibility of enjoying a stay in complete safety and tranquility.

- ◆ The B&B rooms are **rented to only one family unit** at a time, consisting of a minimum of 2 to a maximum of 6 people. The use of the bathroom is therefore reserved.
- ◆ **Access** to the B&B takes place exclusively **from a separate entrance**, without the need to access common areas.
- ◆ The **minimum period of stay is 3 days**.
- ◆ **48 hours will pass between the departure and arrival** of new guests in order to allow thorough disinfection and complete ventilation of the premises.
- ◆ **Breakfast is delivered at an agreed time on the outside** tables reserved for guests by a person wearing a mask and gloves. Guests are requested to leave the tray in the same place for collection. For guests who wish to forego breakfast service there will be a discount of 3 euros per person.
- ◆ **All necessary materials are supplied to disinfect and clean independently**. Only in the case of a stay longer than 7 days a complete cleaning of the premises and linen is carried out.
- ◆ At the end of each stay, all rooms are **disinfected** and linen **washed at 90 °**.
- ◆ **Access to the courtyard is allowed only if equipped with a mask** and keeping the safety distance.
- ◆ **The registration** of new guests, the delivery of the keys and the **payment** (in cash) are **carried out at the same time as the arrival** respecting the current safety regulations by wearing the mask and keeping the safety distance.
- ◆ **Guests who have a fever above 37.5 ° and / or breathing problems are not accepted**. If symptoms indicative of Covid-19 should occur during their stay, guests are required to communicate it promptly to provide isolation and communication to local health authorities.
